Roma

Elegant open-air heat

Roma with grill removed
Reverse: Roma with removable
grill in situ

Prolong your relaxing evenings outside with the warmth of a Roma outdoor fireplace. With an elegant and modern cylindrical exterior and made from lightweight concrete, the Roma is easy to assemble and install and makes an instant freestanding al fresco statement.

The combustion chamber offers an optimal view of the flames and finished in light-coloured Thermotte™, which is extremely durable and shock-resistant. The Roma also comes with a removable grill that can be easily slotted inside the chamber with the provided tools for cooking your own outdoor cuisine.

Dimensions

Product code: 765-025

All dimensions in mm.
Net Weight Range: 352kg**

The nature of the Roma's concrete material may be liable to surface crazing. Whilst for some this natural change in the material makes for attractive aesthetic, if not desired, repairs can be made with light/acrylic filler. If you wish to tailor your Roma further to a colour scheme, the unfinished concrete can be painted with silica-based masonry paint to suit your garden design.

** We strongly recommend that you consider the local regulations regarding safety distances to buildings and vegetation before assembling the product and putting it to use. Please also be aware of possible local temporary fire bans during droughts. In the case that the Roma is placed on a wooden or composite deck, we strongly recommend covering the floor around it with non-combustible material (minimum 50cm wide) in order to distribute weight, avoid embers leaving marks in the deck and in worst case fire.
